Reports from Matanzas, Cardenas, Isabela de Sagua, and Caibarien.

MATANZAS, CUBA, May 14, 1902.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit herewith the following sanitary report of the quarantine district under my command, for the week ended May 10, 1902.

Matanzas.—Twelve deaths occurred in the city of Matanzas during the period covered by this report, showing a mortality of 13.82 per 1,000. The principal causes of death were as follows: Tuberculosis, 2; enteritis, 2; senility, 2; peritonitis, 1; elephantiasis, 1; nephritis, 1; other causes, 3. No case of infectious or contagious character was reported. Sixteen vessels arrived during the week; 6 of these were

inspected and passed and 10 passed without inspection. Twelve bills of health were issued to vessels leaving the port.

Cardenas.—Acting Asst. Surg. Enrique Saez reports that during the week ended May 3, 1902, 10 deaths occurred in Cardenas of the following causes: Enteritis, 2; tuberculosis, 1; bronchitis, 1; nephritis, 1; peritonitis, 1; meningitis, 1; other causes, 3. No case of infectious or contagious character was reported. The death rate for the week was 21 per 1,000. Seventeen vessels arrived during the week, 3 of these were inspected and passed and 14 were passed without inspection. Twenty bills of health were issued to vessels leaving the port. For the week ended May 10, 1902, he reports that 7 deaths occurred in Cardenas of the following causes: Cerebral hemorrhage, 2; enteritis, 2; tuberculosis, 1; peritonitis, 1; softening of the brain, 1. No case of infectious or contagious character was reported. The death rate for the week was 14.70 per 1,000. Eleven vessels arrived and were passed without inspection. Sixteen bills of health were issued to vessels leaving the port.

Isabela de Sagua.—Acting Asst. Surg. Pedro Garcia Riera reports that during the week ended May 3, 1902, 6 deaths occurred in the municipal district of Sagua la Grande of the following causes: Tuberculosis, 1; bronchitis, 1; pneumonia, 1; gastro-enteritis, 1; other causes, 2. No case of infectious or contagious character was reported. The death rate for the week was 14.67 per 1,000. For the week ended May 10, 1902, he reports that 10 deaths occurred in Isabela de Sagua of the following causes: Tuberculosis, 3; broncho-pneumonia, 1; enteritis, 3; other causes, 3. No cases of infectious or contagious character were reported. The death rate during the week was 24.45 per 1,000. Fifteen vessels arrived during the week; 1 of these was inspected and passed and 14 were passed without inspection. Eleven bills of health were issued to vessels leaving the port.

Caibarien.—No report has been received.

Respectfully,

G. M. GUITÉRAS,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Reports from Nuevitas, Puerto Padre, Gibara, and Baracoa.

NUEVITAS, CUBA, May 13, 1902.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit the following report for the quarantine district under my command, for the week ended May 10, 1902: During this period 11 vessels arrived at this port and 8 bills of health were issued. The mortuary report for the week shows 1 death from intestinal tuberculosis. The weather has been very warm and the sanitary condition is good.

Puerto Padre.—Report shows the arrival of 5 vessels, the issuance of 7 bills of health, 2 deaths—1 phthisis, 1 accident—and good sanitary condition.

Gibara.—Report shows 11 vessels arrived, 8 bills of health issued, 2 deaths—gangrene, 1, asystole, 1—and good sanitary condition.

Other reports delayed. No quarantinable diseases reported at any point in the district.

Respectfully,

OWEN W. STONE,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.
